

Designed for absorption. Built for consistency.

Your supplement is only as useful as what your body can take in. We focus on bioavailability, verified quality, and formulas built around how your cells actually work — so daily use adds up over time.

- ✓ BIOAVAILABILITY-FIRST FORMATS
- ✓ MECHANISM-DRIVEN FORMULAS
- ✓ CLEAR, REALISTIC EXPECTATIONS
- ✓ THIRD-PARTY BATCH TESTING

	PUROVITALIS Bioavailability-led formulas	OTHER BRANDS Standard supplement approach
Bioavailability focus	✓ Liposomal and advanced delivery formats, used where they support stability, absorption and predictable daily use.	✗ Often standard powders or capsules, with no explanation of how the nutrient reaches the body.
Formula logic	✓ Ingredients are combined around one clear pathway — NAD ⁺ production, mitochondrial support or antioxidant defence.	✗ Built around one popular ingredient, without showing how the full formula works together.
Quality transparency	✓ Independent batch testing confirms identity, purity and quality before a product is released.	✗ Test results are hard to find, incomplete, or not tied to the batch in your hand.
What we promise	✓ Calm, science-based communication: gradual cellular support, consistency and long-term routines.	✗ Quick-fix claims, vague “anti-aging” language and timelines nobody can stand behind.
Value	✓ Premium quality you can use every day: smart combinations, fewer add-ons, nothing you don’t need.	✗ A lower price, with less clarity on purity, delivery format and formulation strategy.
